Objective

Computer Science graduate with a focus on backend engineering and AI systems. Experienced in building scalable REST APIs and currently developing skills in **agentic AI** and **RAG pipelines**. Seeking a backend or AI/ML engineering role to contribute to real production systems.

Skills

Languages:	C, C++, Python, JavaScript
Backend:	NestJS, FastAPI, REST APIs, Authentication
AI / LLM:	Agentic AI, RAG Pipelines, LangChain, Vector Databases (FAISS), Prompt Engineering
Tools:	MySQL, Apache, Git
Data:	Pandas, NumPy, Matplotlib, Power BI, Excel

Education

Bachelor of Science in Computer Science *Sept 2022 – June 2026*
Bahria University E-8, Islamabad CGPA: 3.05/4.00

Experience

Backend Developer Intern *June 2025 – Aug 2025*

Agentic Soft

- Developed and maintained RESTful APIs using FastAPI and NestJS for web applications
- Implemented authentication and authorisation mechanisms for secure backend systems
- Contributed to code reviews and followed best practices for scalable backend development

Data Analyst Intern *Sept 2025 – Oct 2025*

SoftBox Technologies

- Performed exploratory data analysis using Pandas, NumPy, and Matplotlib on structured datasets
- Created dashboards and visual reports using Power BI and Excel for business insights
- Presented findings to support data-driven decision-making across non-technical teams

Projects

VisiHealth AI – Medical Visual Question Answering System (FYP) *1st Place, FYP Open House 2026*

- Built a MedVQA system using Dual-Encoder + Multi-token Cross-Attention with BioLinkBERT on the SLAKE dataset
- Engineered backend APIs for model inference, ROI localisation, and data processing pipelines

AccessHire – AI-Powered Job Portal for Visually Impaired

- Engineered the entire backend using NestJS (REST APIs, JWT authentication, user and job management) with MongoDB
- Integrated AI-powered speech-to-text & text-to-speech via a FastAPI microservice for fully accessible UX
- Built a content-based recommender system to surface relevant job listings for each user

VelocityMD – Doctor Scheduling System

- Designed RESTful APIs and scheduling logic for appointments and conflict detection (FastAPI)

Metro Ticketing System – MERN Stack

- Developed a MERN-based metro ticketing platform with seat selection and booking confirmation

Achievements

- **1st Position (CS Dept)** – FYP Open House 2026 — Bahria School of Engineering & Applied Sciences
